HWRS 561b: Physical Hydrogeology II

Inverse modeling (Part 2)

Agenda:

Parameter estimation/Inverse modeling using HYDRUS-1D

Inverse modeling using HYDRUS-1D

Exercise 1

Complete the example used in Ty's L13a HYDRUS-inverse tutorial.

Exercise 2

Similar to Exercise 1, but instead of estimating Ks, estimate n and Ks. You can use the following initial guesses. n=2, Ks = 1.5 cm/hour.

Exercise 3

Similar to Exercise 2, but only estimate n, i.e., Ks is given. Use the same initial guess n=2.

True values for the parameters. n=1.56, Ks=1.04.
